

Tsunami® QuickBridge 8200 Series

High PowerPoint-to-Point Wireless Bridge Bundle

Tsunami® QuickBridge 8200 Series

End-to-End Broadband Wireless Product Portfolio

Proxim Wireless offers extremely reliable, secure and easily-deployed solutions for interconnecting corporate and telecommunications networks. This portfolio includes:

- Tsunami® GX- Carrier-class IP Ethernet Bridge for voice and data backhaul for service providers and enterprise applications
- Lynx.GX® Cellular voice and data backhaul, up to DS3 interface
- QuickBridge® Easiest-to-install "Hop-in a- box" complete kit Ethernet Bridge for campus and small business networks

Proxim Wireless is a global pioneer of end-to-end broadband wireless systems that deliver the quadruple play. From Wi-Fi to wireless Gigabit Ethernet — our WLAN, Mesh, WiMAX and point-to-point products are available through our extensive global channel networks.

Presenting a Dual radio Wireless Backhaul Solution that Exceeds 4G Speed Requirements with supreme flexibility of 1MHz channel spacing

The Tsunami® QB-8200, is a high power, extremely reliable and a cost-effective, non-line-of-sight 4G point-to-point (PtP) wireless backhaul solution. The Tsunami® QB-8200 delivers data rates of 300 Mbps plus, along with excellent spectrum flexibility of upto 1MHz channel spacing and high power radios capable of 27 dBm Tx power for extend coverage.

With its incredible channel capacity & flexibility, excellent spectrum efficiency and a highly evolved prioritization platform tailored to deliver voice, video and data applications, the Tsunami® QB-8200 satisfies carriers, wireless service providers and Government organizations with requirements for fast and reliable wireless backhaul.

The Tsunami[®] QB-8200 leverages the advantages of OFDM, MIMO radio innovations and Proxim's proprietary Wireless Outdoor Routing Protocol (WORP) to provide wireless performance in excess of 4G products on the markets today.

Superior Performance

- High power radio capable of up to 27 dBm Tx power to extend the range and coverage
- Includes dual Gigabit Ethernet ports, enabling higher throughput which would otherwise be limited by the 10/100 Ethernet ports seen in other devices throughout the market
- Reliable & high performance under all traffic loads using Proxim's Wireless Outdoor Routing Protocol (WORP)Built-in feature rich network protocols for bridging, routing and gateway functionality

Non-Line-of-Sight and Advanced Features

- Non-line-of-sight capable, utilizing OFDM and 2x2 MIMO techniques to improve link performance and penetrate through or around obstructions better
- Features dual Gigabit Ethernet ports with PoE in/out to power other devices like surveillance cameras and wireless access points
- Create tiered QoS service classes with ease

Frequency Agnostic

- Operates in licensed and unlicensed frequency bands
- Flexible channel planning with 5, 10, 20 and 40MHz support with 1MHz channel spacing
- Provides support for extended frequency bands from 4.900 to 5.925 GHz

Carrier-Grade Security

- Implements tiered security layers for the most secure outdoor wireless communications in the unlicensed frequency spectrum
- Utilizes Proxim's Wireless Outdoor Routing Protocol (WORP), which prevents snooping, and features highly-secure remote management via SSL, SSH and SNMPv3
- Provides military-grade security with AES encryption technology, prevents unsecure clientto-client communications and leverages MAC, Ethertype and IP address packet filtering for granular network security

Product Line Compatibility

Connects to existing Tsunami[®] QB 8100

Can utilize existing mounting kits of the Tsunami product line

PRODUCT MODELS						
QB-8200-LNK	Tsunami QB 8200 Link, 300 Mbps, MIMO 2x2, Type-N Connectors (Two QB-8200-EPA)					
QB-8250-LNK	Tsunami QB 8250 Link, 300 Mbps, MIMO 2x2, 23 dBi panel antenna (Two QB-8250-EPR)					
INTERFACES	Two auto MDI-X RJ45 10/100/1000Mbps Ethernet					
	- Port #1 with PoE in & Data - Port #2 with PoE out (802.3af pin out) & Data

APPLICATIONS

• Backhaul to a Central POP

Avoid expensive installation and recurring charge of a second wire line backhaul to a remote virtual POP

• Leased Line Redundancy

Eliminate recurring DS-3 leased line charges with one time installation charge of a QuickBridge link

Repeater

Extend distance or overcome path blockage by adding point-to-point hops

• High-bandwidth Last Mile Access

Use QuickBridge to deliver TLS (Transparent LAN Services) to corporate parks

• Inter-POP Redundancy

Avoid downtimes caused by a wireline backhaul failure by adding a QuickBridge link as an inter-POP redundancy
